

Wiring diagram layout

- A - Battery
- B - Starter
- C - Generator (GEN)
- C1 - Voltage Regulator (VR)
- D - Ignition/Starter Switch
- S162 - Fuse -1- (30) in fuse bracket / battery
- S163 - Fuse -2- (30) in fuse bracket / battery
- T4e - 4-Pin Connector, on transmission
- T10a - 10-Pin Connector, on protective housing for control module, in engine compartment, left
- ① - Ground strap, battery to body
- ② - Ground strap, transmission to body
- ⑤①① - Screw connection -1- (30), on relay panel

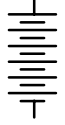

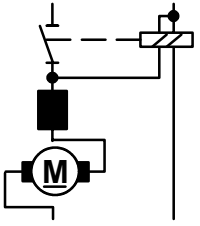

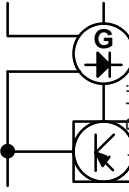

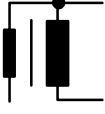

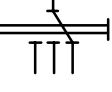

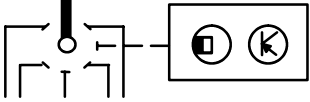

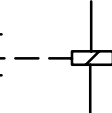

Legend
In all wiring diagrams the same component designation (code) is used for a particular component; for example, always A for battery.

How to read wiring diagrams

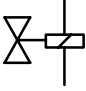

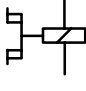

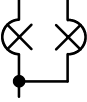

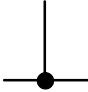

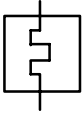

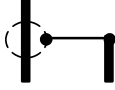

- 1 - **Relay location number**
Indicates location on relay panel.
- 2 - **Arrow**
Indicates wiring circuit is continued on the previous and/or next page.
- 3 - **Connection designation - relay control module on relay panel**
Shows the individual terminals in a multi-point connector.
For example: contact 24 on terminal **4** on relay panel.
- 4 - **Diagram of threaded pin on relay panel**
White circle shows a detachable connection.
- 5 - **Fuse designation**
For example: S228 = Fuse number 28, 15 amps, in fuse holder
- 6 - **Reference of wire continuation (current track number)**
Number in frame indicates current track where wire is continued.
- 7 - **Wire connection designation in wiring harness**
Location of wire connections are indicated in the legend.
- 8 - **Terminal designation**
Designation which appears on actual component and/or terminal number of a multi-point connector.
- 9 - **Ground connection designation in wire harness**
Locations of ground connections are indicated in legend.
- 10 - **Component designation**
Use legend at bottom of page to identify the component code.
- 11 - **Component symbols (see page IV - VI)**
- 12 - **Wire cross section size (in mm²) and wire colors**
Abbreviations are explaining in color chart beside the wiring diagram.
- 13 - **Component symbol with open drawing side**
Indicated component is continued on another wiring diagram. The number of corresponding wiring diagram can taken from list of contents.
- 14 - **Internal connections (thin lines)**
These connections are **not** wires. Internal connections are current carrying and are listed to allow tracing of current flow inside components and wiring harness.
- 15 - **Reference of continuation of wire to component**
For example: Control module for anti-theft immobilizer J362 on 6-Pin Connector, terminal 2
- 16 - **Relay panel connectors**
Shows wiring of multi-point or single connectors on relay panel
For example: S3/3 Multi-point connector S3, terminal 3
- 17 - **Reference of internal connection continuation**
Letters indicate where connection continues on the previous and/or next page.

Symbols used in wiring diagrams

	Fuse		Switch (manually operated)
	Thermo-fuse (Circuit Breaker)		Switch (thermally operated)
	Battery		Push button switch (manually operated)
	Starter		Switch (mechanically operated)
	Generator (GEN)		Switch (pressure operated)
	Ignition Coil		Multiple switch (manually operated)
	Distributor (electronic)		Resistance
	Spark plug connector and plug		Variable resistor (Rheostat)
	Glow plug Heater element		Resistor temperature dependent
			Heater element temperature dependent
			Relay

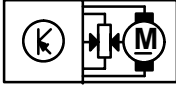

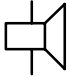

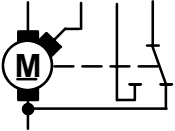

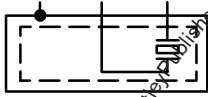

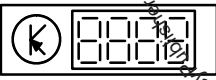

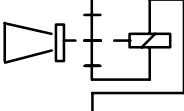

97-12201

Symbols used in wiring diagrams

	Diode		Solenoid valve
	Zener diode		Magnetic clutch
	Diode light sensitiv		Wire connector
	Light bulb		Pin connector
	Light bulb (dual filament)		Multi-point connector at component
	LED		Internal connections in component
	Interior light		Wire connection detachable
	Instrument (Gauge)		Wire connection fixed
	Electronic control module		Wire connection in wiring harness
	Rear window defogger heat element		Resistance wire
	Cigarette lighter		Shield wire

97-08153

Symbols used in wiring diagrams

	Control motor, headlight range adjustment		Speaker
	Motor		Antenna with electronic antenna amplifier
	Wiper motor 2-speed		Radio
	Crankshaft position sensor (CKP)		Heated oxygen sensor
	Knock sensor (KS)		
	Analog clock		
	Digital clock		
	Multi-function indicator		
	Airbag spring		
	Speed sensor		
	Horn

Explanation of troubleshooting procedures

Starting with the reported problem, troubleshooting procedures show step-by-step **what** is checked and **how** it is checked in order to find the problem in the quickest and most reliable way. If several causes (of a problem) are possible in one system, a test procedure is used for diagnosis.

Structure of a Test step:

Example of a troubleshooting procedure:
